

Upload, share and print from Google Docs

Google Docs

Business Challenge:

Staying connected with colleagues and keeping information current when doing business in a decentralized and global environment is challenging.

- Storing and accessing documents can take significant time.
- Failure to share important information with others can jeopardize business.

Lexmark's Advantage:

Lexmark Google Docs™ app is ideal when you upload documents to your Google Docs account, including shared folders, for business collaboration. Browse your Google Docs account and print shared documents on demand.

Features

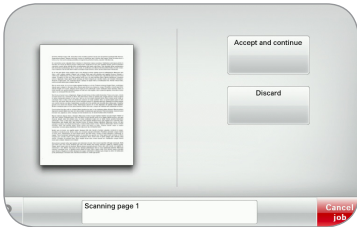

Print on demand

Print a supported business document saved to your Google Docs account when you need it.

Ideal for:

Scanning and accessing Google Docs directly from the device- no need for the computer.

Scan and Upload

Quickly scan documents and upload them directly to your online Google Docs account.

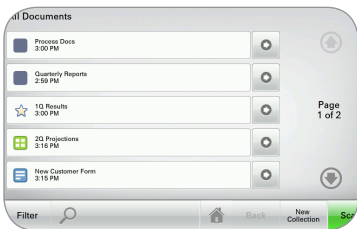

What are the advantages of Google Docs?

• Save time

Easily access and save your important information directly, using the touch screen of your Lexmark multifunction device.

• Easy to use

The touch screen of your Lexmark multifunction device lets you complete scan and print functions without the use of a computer.

Enhance and collaborate

Scan a document into a shared collection for quick and easy collaboration.

NOTE: A Google account is required to use this app.
